

## Design Manager (Pipelines)

[Apply Now](#)

Company: Antal International

Location: Thiva

Category: architecture-and-engineering

### Job Description

Our Client is a world-leading manufacturer in the Oil and Gas Industry.

For their exponentially growing operations in Viotia, they are searching for a 'Design Manager (Pipelines)'.

### Your responsibilities:

- Provide expert support for matters related to codes and practices regarding pipeline design (including material selection, construction, operation and integrity).
- Review the design aspects of the projects in the tendering phase and support technical communication and negotiations with customers.
- Support the company's product development projects for advanced applications such as pipes for emerging fuels (H<sub>2</sub>, CO<sub>2</sub>) and pipes for offshore laying (deep offshore, reeling).

### Your profile:

- Strong academic background in Engineering.
- More than 3 years of experience in the broader pipeline design, ideally in the Oil & Gas/Construction sectors.
- A postgraduate degree related to pipeline engineering or fracture mechanics shall be considered an asset.
- Experience in the use and application of pipeline design codes Familiarity with the use of pipeline design software
- Excellent English skills
