

## Energy Efficiency Design Engineer (Buildings)

[Apply Now](#)

Company: Elpedison

Location: Marousi

Category: architecture-and-engineering

# One Group | One Power

ELPEDISON, the 1st independent Energy Producer in Greece and one of the biggest, most reliable, and friendly Alternative Electricity and Natural Gas Suppliers, has emerged from the collaboration between two Energy Groups: - Hellenic Petroleum, one of the largest commercial and industrial energy Groups in Greece and South-Eastern Europe, and - Edison, the longest-running energy company in Europe and the largest private energy company in Italy. Thanks to the knowledge and experience that we have inherited from our parent companies, we aspire to always be a leading company in our sector, playing a significant role in power generation while offering high-quality and innovative energy products and services with stability and consistency.

ELPEDISON, with its two privately-owned power plants in Thisvi (Voiotia )and Thessaloniki, with a total installed capacity of 820 MW, uses natural gas as fuel and ensures a clean and continuous electricity flow, based on a highly environmentally friendly power generation process.

The **E nergy Efficiency Design Engineer** designs and presents to customers customized energy solutions that match in the best their current and future needs, leveraging best-in-class technologies and systems. The main services/actions include - among others - site upgrades, facility energy management, and building automation for commercial, tertiary, and industrial buildings of the private or/and public sectors.

### **What will you do:**

Conduct on-site audits, field inspections, and sub-metering to collect data for energy

efficiency projects.

Communicate with customers to obtain all the appropriate information for site upgrade analysis.

Inspects or monitors energy systems, including HVAC and lighting of commercial or/and industrial use.

Propose upgraded actions for the increase in energy efficiency or/and energy savings in HVAC and lighting systems, taking into consideration best market practices and standards.

Evaluate energy conservation possibilities by reviewing architectural, mechanical, and electrical drawings of a customer's site.

Manage the design and development of energy efficiency projects as per the guidelines set by the Energy Efficiency Services Business Unit.

Consult the site engineers for installation/integration of energy-efficient systems (mechanical or electrical).

Prepare technical reports for implementation of energy-efficient designing.

Configure system database for reporting, alarming, and monitoring of Building Automation systems.

Visit customers and present business analysis and technical-economic solutions for turnkey projects and ESCO contracting models, addressing both technical and commercial terms using the appropriate argumentation.

Work closely with the Energy Efficiency Services Sales Department for the day-to-day customers' management up to their contracting.

Scout the market and proposes new technologies and innovations to further strengthen internal engineering design skills

**What you will need in order to succeed:**

A Bachelor's degree in Mechanical, Electronical or Electrical Engineering

A Master's degree would be considered a plus

At least 3-4 years of relevant working experience in an organized technical projects consultation or industrial environment

Chartered Engineering Status, Member of the Technical Chamber of Greece

Professional ability to speak and write in English

Solid Software Skills, MS Office, MS Project, CAD programs

Excellent analysis and organizational skills

Excellent communication, customer management, interpersonal and teamwork skills

People management skills (refers to the external partners)

### **Our offer to you:**

Competitive salary

Performance-based variable pay

Ticket restaurant card

Transportation reimbursement

Private Health Insurance coverage

Pension Scheme

Home electricity and natural gas discount

Continuous learning & upskilling opportunities and access to our premium online training platform

Hybrid Working

One extra day of paid time off

Reimbursement for your athletic activities

Unlimited fruits and snacks at the office
