Full Stack .NET/Angular Software Engineer

Apply Now

Company: Uni Systems

Location: Greece

Category: computer-and-mathematical

At Uni Systems, we are working towards turning digital visions into reality. We are continuously growing and we are looking for a Full Stack Software Engineer (.NET/Angular) to join our UniQue Banking & Finance team.

In this role, you will create software solutions by developing, implementing, testing and maintaining .Net/Angular based components and interfaces. You will also participate in the requirements' analysis, solution design and monitoring of the project in order to meet the functional and technical requirements

What will you be bringing to the team?

Our UniQue people come from a variety of different backgrounds and industries, with different skillsets and approaches, but they have one thing in common: passion for technology and innovation! For the Full Stack Software Engineer position we expect you to:

- Implement and develop functional and technical requirements, as designed in technical documentation specification and coding standards

- Deliver highest quality software by creating unit test plan and testing code thoroughly

- Ensure designs are in compliance with specifications

- Prepare and produce releases of software components

- Contributing in all phases of the development lifecycle

Involve in code reviews and training.

Participate in creation of the documentation of the deliverables of the project

Ensure the smooth communication with the customers (via email or personal meetings)

Know the business rules and concepts, software specifications and designs provided by the technical lead and apply them in completing the assigned task

Report to a technical lead

Requirements

What do you need to succeed in this position?

Your experience, skillset and qualifications are going to help you succeed in this position, moving forward. We would like you to have:

University/College degree in Computer Science, Information Technology or other relevant discipline

3+ years experience in full stack development using .NET technologies (C#, ASP.NET, MVC, Web API)

Proficient in Angular framework for front-end development

Strong understanding of object-oriented programming and Design Patterns

Proven and solid experience and understanding of RESTful APIs and SOAP based Web Services

Strong proficiency in HTML5, CSS3, JavaScript and related web technologies

Solid understanding of SQL databases (SQL Server, MySQL, etc.) and ability to write complex queries and optimize database performance

Experience in Microservices design patterns and architecture

Knowledge of DevOps practices, automated testing and continuous integration/continuous deployment (CI/CD) pipelines

Knowledge of cloud-based technologies such as Microsoft Azure or AWS

Experience with Agile/Scrum development methodologies

Benefits

What are we offering to our UniQue IT people?

People-first approach and open environment to express your ideas

Ticket restaurant – meal vouchers

Corporate laptop and equipment

Corporate mobile phone subscription

Work-life balance and a hybrid #li-hybrid work model

Health and insurance plan for you and your family members

Employee consulting and guidance support by Ergonomia

Continuous training and certifications

Discounts on the services and products of our Group's companies

Gift vouchers for major life milestones

Special work schedule on summer Fridays and your birthday

At Uni Systems, we are providing equal employment opportunities and banning any form of discrimination on grounds of gender, religion, race, color, nationality, disability, social class, political beliefs, age, marital status, sexual orientation or any other characteristics. Take a look at our Diversity, Equality & Inclusion Policy for more information.
