

## Machine Learning Engineer

[Apply Now](#)

Company: Athens Technology Center

Location: Athens

Category: computer-and-mathematical

### Athens Technology Center is hiring a Machine Learning Engineer

#### About us

ATC is an Information Technology Company offering solutions and services targeting specific sectors incl. the Media, Banking, Retail Sectors, Utilities and Public Sector Organizations. As a full-service software development company, we apply modern design principles, along with the latest data science, machine learning, cloud, mobile and desktop technologies. We strive to deliver quality software solutions for top clients and global leaders in numerous industries, while at the same time being at the forefront of research and innovation.

#### The Position

Athens Technology Center is looking for a qualified **Machine Learning Engineer** to join our R&D department. You will be member of a cross-functional Agile team consisting of ML engineers, software developers and DevOps specialists. You will be involved in designing, deploying, maintaining and optimizing ML solutions in the scope of both research and commercial projects. This includes predictive analytics, anomaly detection, pattern recognition and supervised/unsupervised modelling regarding streaming and text processing using cutting edge technologies.

#### Responsibilities

- Keep track of latest AI research relevant to our business domain

- Design and develop machine learning and deep learning systems

Design, implement and test technical solutions in backend

Implementing appropriate ML algorithms

Prepare technical, operational and user related documentation in support of applications

## **Requirements**

Degree in Computer Science, Information Technology or equivalent

Excellent communication skills in English both verbally and written

2+ years working experience in relevant position

Relevant experience in the fields of Machine Learning and Neural Networks

Understanding of modern API design and RESTful principles

Familiarity with Git version control system

## **Additional experience in any of the following fields is a plus**

Experience building AI models in platforms such as Keras, TensorFlow, or PyTorch

Relevant experience in the fields of Natural Language Processing and Deep Learning

Relevant experience with Large Language models and Transformers

Specialized knowledge in working with cutting-edge technologies, including Large Language Models and Transformers, demonstrating a commitment to staying at the forefront of advancements in the field.

Prior hands-on experience with Docker and Kubernetes

Experience in Cloud Platforms (e.g. AWS, Azure, Google Cloud Platform)

Agile and Scrum methodologies

## **Benefits**

Competitive compensation package

Private health coverage

Experience and knowledge in diverse scientific areas and the possibility to explore a variety of topics

Tailored training programme and access to cut-edge skills.

Working with international teams and world-class institutions and clients

Flexibility in working conditions (blend teleworking with office)

Friendly, pleasant and creative working environment

If you are searching for a company and a team that takes into account your ideas and individual growth, recognizes you for your unique contributions, fills you with a sense of purpose, and provides a fun, flexible, and inclusive work environment – apply now.
