

Senior Software Development Engineer - C++

[Apply Now](#)

Company: Altair Engineering

Location: Greece

Category: computer-and-mathematical

Transforming the Future with the Convergence of Simulation and Data

Senior Software Engineer

Altair is seeking a Senior Software Engineer to be part of a fast moving team that requires strong problem solving and object-oriented design and analysis skills. Ideal candidates are innovative, flexible, self-directed and able to write portable, high-performance, bullet-proof code. Knowledge of software development cycles and tools are very important. You will be working on a framework that is used by Altair Modeling and Visualization products for FEA, CFD and MBD simulations.

What You Will Do:

Design, prototype, implement, unit test, profile and troubleshoot features written in C++ and/or Python;

Communicate complex problems via code and diagrams;

Write portable & efficient code for Windows and Linux platforms;

What You Will Need:

Basics:

Bachelor degree in Computer Science or related;

4-5 years of experience in C++ development, including strong expertise in data structures and algorithms;

High energy with ability to be self-driven when direct supervision is not available;

Excellent communication skills both verbal and written;

Strong analytical and problem solving skills, attention to detail;

Previous experience working on both Windows and Linux platforms;

Preferred:

Experience with Python or other scripting language is desirable;

General understanding of multi-threaded programming concepts;

Basic math skills including linear algebra;

How You Will Be Successful:

Envision the Future

Communicate Honestly and Broadly

Seek Technology and Business “Firsts”

Embrace Diversity and Take Risks
