

Senior Technical Analyst (m/f/d)

[Apply Now](#)

Company: SkyCell AG

Location: Greece

Category: computer-and-mathematical

Born from a single question, innovation is in our DNA. Having recently celebrated our 10-year anniversary, we are a diverse and quality-conscious company, which has set itself the goal of transporting temperature-sensitive medicines in a more reliable and sustainable way. Long story short, we help save lives and preserve the environment.

Our goal? To continue to advance towards zero loss in the pharma supply chain, worldwide.

If you're a Senior Technical Analyst who has an inquisitive mindset and a passion for solving problems while always looking for opportunities to expand your knowledge - this could be the role for you:

Here's what you'll do:

Document business requirements to the appropriate technical level (process flows, entity diagrams, etc)

Evaluate solutions with the development team by exploring options to address issues or new requirements

Agree on the most optimal course of action in case multiple options available together with the team

Support the maintenance of technical documentation (specifications, system diagrams and data models)

Capture non-functional requirements considering impact on scalability, performance,

security, etc

Validate assumptions through data analysis in collaboration with business stakeholders and technical teams

Translate complex business requirements into technical specifications and solutions

Document integration solutions based on various stakeholders input for seamless system interoperability

Participate in testing activities and validate that technical solutions meet specified business requirements

Analyse complex datasets to extract meaningful insights, contributing to data-driven decision-making

Review and support with the automation testing and non-functional requirements testing strategy process

Develop and design Power BI reports and dashboards for business review and feedback

Use SQL for basic reporting tasks, such as aggregating, calculations and summarisations

Utilize the Gherkin language (Given-When-Then) to express use cases and business rules

Requirements

This is what you'll need:

Bachelor's degree in Computer Science, Information Technology, or equivalent experience

Proven experience in technical analysis, system design, or a similar role

Strong understanding of system architecture, software development, and database design

Proficiency in data analysis and capable of using data analysis tools, knowledge of SQL, Python or R

Proficiency in modelling notations such as UML, DFD, ERD, system architecture diagrams

etc.

Excellent problem-solving skills and the ability to think analytically

Strong communication skills, both written and verbal, with the ability to convey technical concepts to non-technical audiences

Experience in requirements engineering and business process modelling

Knowledge of various software development methodologies, such as Agile or Waterfall

Ability to work collaboratively in a team environment and manage multiple priorities

Detail-oriented with a commitment to high quality and accuracy

Language: English

Benefits

What we can offer you:

Remote working

Flexible working hours for work/life balance

Interdisciplinary and varied projects

Diverse and global work culture/ environment

Possibility to work for an environmentally conscious company

Unique opportunity to actively shape processes

Why SkyCell:

We are looking for people who challenge the status quo and thrive on making a difference to people and the world around us. That's where our SkyMind Cloud Development team play a pivotal role and you could be a part of it.

SkyMind's Cloud Development team builds a next-generation visibility platform that allows our customers (mainly pharma companies, but also logistics service provider) to monitor the temperature and position of their shipments in real-time. They combine this with sophisticated risk assessment capabilities, alert functionality and simulation models that allow predictions of

potential issues, e.g., because a container was forgotten on a runway in Dubai. The team use modern, standard technology, constantly optimize our development processes, and have close and direct interaction with our product management function.

We are Innovative Award Winners:

We're driven by our core values and guided by our collaborations, purpose, and employees. Our commitment to changing the face of medical supply chains, making them safer, more secure, and more sustainable resonates strongly with every one of our employees; we're therefore incredibly proud to have been certified as a Great Place to Work alongside being awarded a sustainability rating of Platinum by EcoVadis.

If you would like to know more about us, visit [and search #WeAreSkyCell on LinkedIn](#). To become part of our journey and make a difference – click apply and we will be in touch!

Please contact Lucy Slough, Talent Acquisition Specialist if you have any questions ().

SkyCell AG is proud to be an equal opportunities employer, we celebrate and support diversity and are passionate about creating an inclusive environment for all employees. We do not discriminate based upon race, religion, colour, national origin, gender (including pregnancy, childbirth, or related medical conditions), sexual orientation, gender identity, age, disability, or any other applicable legally protected characteristics.

For this position we only consider direct applications
