

Software Quality Assurance Lead

[Apply Now](#)

Company: Altair Engineering

Location: Greece

Category: computer-and-mathematical

Job Summary:

Altair's workload management solutions (Accelerator, PBS Professional) are in use in the world's top tier technology companies. Supported operating systems include Red Hat Enterprise Linux and Microsoft Windows. In addition, Altair's Monitor, Allocator and FlowTracer products are widely used in the high-tech industry.

The successful applicant for this position will play an important QA role in Leading the QA team for releases and deliveries. Also contributing to automating and testing the above Altair products in a multiplatform environment. In addition, you work with other QA Engineers across Altair as part of our Quality Center of Excellence including Security Testing, Performance Testing, Automation and more.

As a member of the Software Quality Assurance team, you will work closely with the product management, software development and applications engineering teams. You must be driven by a desire to be efficient, collaborative, thoughtful and productive in a fast-paced environment of prolific engineers.

What You Will Do:

Actively participate in all QA responsibilities including reviewing the requirements, writing test cases, adding automated tests, executing the manual and automated tests.

Plan, develop, and execute test strategy across products and platforms for all releases.

Communicate and track any quality risks, gaps or issues to the stakeholder groups.

Lead triage meetings.

Identify the test infrastructure requirements and work with TestOps team.

Report quality metrics and implement measurements to determine test effectiveness, testing efficiency, and measure the overall quality of the Product.

Work on building a Quality driven engineering culture that helps ship products rapidly and with good confidence.

Act as the primary point of contact for all quality aspects of releases.

Working with product and delivery Agile scrum teams.

What You Will Need:

Basics:

Bachelor's degree in software engineering or similar technical field or equivalent experience
5+ years of related work experience.

Experience testing command line applications on various OS including Linux and windows.

Experience with testing and automating APIs.

Proficient in Python (preferably Python3).

Extensive experience testing complex enterprise client/server products on Linux and Windows

Have detailed knowledge of cross-platform software testing tools and environments.

Insight into how customers use software and the ability to use that knowledge to design better tests, identify more meaningful bugs and offer product ideas that add high value.

Excellent oral and written communication skills, including the ability to work effectively in a distributed team.

Experience with QA Test Management Systems and assuring coverage against requirements for features and regression testing.

Ability to work flexible hours to communicate with USA-based and other technical teams.

Preferred:

Understanding of high-performance computing solutions is strongly preferred.

Knowledge of workflow systems.

Understanding of application security testing and tools (e.g., Web Inspect, Veracode).

Understanding of software license management systems (e.g., FLEXIm, RLM).

Understanding of software defect analysis systems such as Purify, AddressSanitizer, Coverity,

valgrind.

Understanding of software performance tools (callgrind, Quantify).

Experience in using pytest or nose test framework for backend CLI testing.

Experience in using containers (docker, Kubernetes).

Experience testing C++ applications.

Experience testing against a variety of cloud providers (AWS, Azure, Oracle).

Experience with performance testing using a variety of tools

How You Will Be Successful:

Envision the Future

Communicate Honestly and Broadly

Seek Technology and Business “Firsts”

Embrace Diversity and Take Risks

Why Work With Us:

Altair is a global technology company providing software and cloud solutions in the areas of product development, high performance computing (HPC) and data analytics. Altair enables organizations in nearly every industry to compete more effectively in a connected world, while creating a more sustainable future. With more than 3,000 engineers, scientists and creative thinkers in 25 countries, we help solve our customer’s toughest challenges and deliver unparalleled service, helping the innovators innovate, drive better decisions, and turn today’s problems into tomorrow’s opportunities.

For more than 30 years, we have been helping our customers integrate electronics and controls with mechanical design to expand product value, develop AI, simulation and data-driven digital twins to drive better decisions, and deliver advanced HPC and cloud solutions to support unlimited idea exploration.
