System Engineers - Feature Owners for AUTOMOTIVE (telematics)

Apply Now

Company: Software Competitiveness International

Location: Marousi

Category: architecture-and-engineering

Software **Com**petitiveness **International S.A. (Soft Com International)**, a rapidly growing, innovative Software Company, located in Athens. Through our team, of highly motivated Software Engineers with a strong technical background and long experience in complex international projects, we provide to our customers, both locally and globally, technical excellence and valuable services.

In the year 2022, we doubled our company regarding projects and personnel increasing our reputation and presence internationally, generating a high amount of additional, very promising working positions in Greece. Our expansion trend is continuing.

(awards 2023: Top Export Company in HR (Gold) & Top Services Export Company (Silver), από ethosEVENTS)

Currently we are looking for

System Engineers - Feature Owners for AUTOMOTIVE (telematics),

to be part of our teams, working **for the Global Automotive Market,** in Greece.

Requirements

Role:

The role of a feature owner is:

to understand the needs of a customer and applicable regulatory standards and

to translate them into actionable requirements for the mechanical, electrical, and software development teams.

In that role the feature owner ensures that, the corresponding features meet customer expectations and regulatory standards.

Required seniority:

seniors (minimum hands on experience: 8 years)

juniors (minimum hands on experience: 2 years)

Major Responsibilities

Responsible for translating customer needs/requirements into internal requirements that can be implemented by the development team (for a feature or a set of features)

Approves the readiness level of a feature

Member of the Agile Team responsible for defining Stories and prioritizing the Team Backlog – having the role as the voice of the customer

Supports a seamless delivery of the function to the customer across all technical domains

Manages and discusses technical customer needs and requirements and responsible for collecting and prioritizing input from all relevant stakeholders

Works directly with the project managers and the development team members to ensure process compliance and timely delivery of the features he/she is responsible for

Subject matter expert for one or more of the following areas would be beneficial but at least the willingness to quickly get familiar within such topics is a must:

Voice call

SMS

VLAN

Firewall

OpenSSL

Certificate management

GNSS (GPS, Galileo, BeiDou, GLONASS)

Inertial sensors for motion detection

Bluetooth LE

Ultra Wideband

Broadcast Radio (AM, FM, DAB, HD Radio, SiriusXM)

Media (streaming, MP3/wave player)

IoT

4G, 5G

Logging/Tracing

File systems

Application frameworks (e.g. macchina.io)

Required Skills and Competencies

Bachelor's degree in Computer Engineering / Software Engineering / Electrical Engineering / Computer Science or equivalent

Knowledge of product development engineering practices in IoT , or automotive;

Technical knowledge of embedded electronics products (HW and/or SW)

very good oral and written communication skills in English

Experience in writing technical requirements and higher level architectural designs (for seniority level: "seniors")

Knowledge of analysis and engineering tools such as version control/configuration management, UML tools, static code check tools and other SW development/ quality tools

Beneficial experiences and/or skills (nice to have)

The successful candidates will be part of a team of highly qualified professionals, working for

automotive software products, established in Greece (Athens), being involved in the full software development lifecycle. He/she will have a detailed **enabling** ("training on the job") in Greece and/or in Germany.

Prerequisites:

Ability to travel abroad, as needed (< 10%)

Participation in a technical interview and a technical test.

Starting date of the cooperation: asap

In case you are willing to become part of our team and make the difference, please send your detailed CV in English, quoting reference**ref: JN-FO-09-23** , to the following e-mail address: , asap **.**

All applications will be treated as confidential.
